

1: Need more effort 3: Satisfactory 5: Very good

Project Title					
Team members					
Questions	1	2	3	4	5
Was the introduction/motivation clear?					
Were different SE process and phases employed effectively?					
Were the experiments, results, and conclusion satisfactory?					
How was the presentation in general?					

Was the motivation clear?

What is the problem?

Why is it important and why we should care?

Were different SE process and phases employed effectively?

What process you used and why?

Were you able to cover all the SE phases in this project?

Were the experiments, results, and conclusion satisfactory?

Were you able to test the product?

What tools did you use?

How did you manage the communication among team members?

Did you implement any new technology or method in your project?

What are the results?

How was the presentation in general?

Finished on time?

Effective visualizations or demo? (Are they relevant? Do they help you better understand the project's approaches and ideas?)

Use of text (Succinct or verbose?)
